

A8 Core

Media Kit

The operating **system** for financial accounts.

ABOUT A8 CORE™

Boilerplate — copy and paste.

ONE LINE

A8 Core™ is the API-driven account core that spans banking and wealth — every account type, one integration.

50 WORDS

A8 Core™ (Financial Infrastructure Services Core Platform) is the API-driven, ultra-secure, bank-grade account core that fintech and wealthtech build on. It opens, funds, and transacts across every account type — demand-deposit, retirement, taxable, trust, and private-fund — on one multi-tenant, white-label integration. Compliant by design; secured by B5 Secure.

100 WORDS

A8 Core™ (Financial Infrastructure Services Core Platform) is the operating system for financial accounts — the API-driven, ultra-secure, bank-grade account core that fintech and wealthtech companies build on. It opens, funds, and transacts across the full account spectrum (demand-deposit, retirement, taxable, trust, and private-fund) for individuals and entities, on one multi-tenant, white-label integration. Bank cores do banking and wealth platforms do wealth; A8 Core™ does both, plus retirement and entity structures. Compliance and regulatory reporting are native to the core, and security is provided by B5 Secure. A8 Core™ turns a 6–18-month account-infrastructure build into one integration. From Financial Infrastructure, Inc.

FAST FACTS

At a glance.

What it is

The account operating system — an API-driven, multi-tenant, white-label account core.

For

Fintech & wealthtech builders, and the providers who serve them.

Compliance

Native controls + regulatory reporting (e.g., 1099/5498) per account type and transaction.

Founder

Todd Yancey.

Spans

Banking AND wealth — DDA, retirement, taxable, trust, private-fund, entity.

Security

Secured by B5 Secure — per-record authorization, signed requests, tamper-evident audit.

Company

Financial Infrastructure, Inc. (Delaware C-corp, forming 2026).

Tagline

The operating system for financial accounts.

FOUNDER

Todd Yancey, Founder.

WHERE A8 CORE FITS

The account core, between your product and the regulated rails

Your product / app (white-label UX, your brand)

A8 CORE™ — THE ACCOUNT OPERATING SYSTEM

Open · Fund · Transact across every account type

5 service families · 600+ endpoints · event-sourced ledger · multi-tenant & white-label

Native compliance & reporting (1099/5498...) · secured by B5 Secure

Regulated rails

Sponsor banks · ACH/wire/RTPIFedNow · custodians

Identity & data

KYC / KYB / AML · verified-identity reuse

One integration replaces a bank core + wealth platform + retirement recordkeeper + docs + compliance.

A8 Core™ · Financial Infrastructure, Inc. · the operating system for financial accounts

Where A8 Core™ fits

ACCOUNT SPECTRUM

Every account type, on one integration

1

Demand Deposit

Checking, savings & credit

2

Retirement

IRA, Roth, SEP, Solo 401(k), HSA, 529

3

Taxable

Individuals and entities

4

Trust

For benefit of a third party

5

Private Fund

For benefit of private funds

Compliant by design — native controls and reporting per account type, secured by B5 Secure.

For individuals and entities, across unlimited providers — the union no single incumbent core serves.
